Unifying Automated and Proactive Detection

Stay ahead of emerging threats with IBM Security and Sqrrl

Cybercriminals are more sophisticated than ever, and the attacks on all types of organizations show no signs of slowing down. That’s why IBM Security, Sqrrl and a wide range of security industry leaders have joined forces on the IBM Security App Exchange—so security teams from around the world can work together to create better network defenses.

Join in the Hunt with Sqrrl

Sqrrl is the security analytics company that enables organizations to target, hunt, and disrupt advanced cyber threats. Sqrrl’s industry-leading threat detection and response platform unites threat hunting, behavioral analytics, and incident analysis capabilities in an integrated solution. Unlike traditional signature- or rule-based detection solutions, Sqrrl’s platform detects the Tactics, Techniques, and Procedures (TTPs) of cyber adversaries, greatly reduces the time to investigate cyber incidents.

Sqrrl utilizes linked data, machine learning, User and Entity Behavior Analytics (UEBA), risk scoring, and Big Data technologies to power a Behavior Graph that reveals malicious patterns and anomalies hidden within security datasets.

The IBM Security App Exchange provides organizations with:

- Convenient web access to validated extensions to IBM Security solutions
- Additional IBM® Security QRadar® correlation rules, dashboards, visualizations and third-party integrations
- The ability to share content with industry peers to help eliminate threats

Sqrrl Data, Inc.
125 Cambridge Park Dr.
Cambridge, MA 02140
info@sqrrl.com
As an industry leading hunting platform, Sqrrl lets you engage in proactive detection of threats that can lie hidden in your network. Together with a powerful SIEM like IBM QRadar, you can cover all of your bases.

Discover the IBM Security App Exchange
The IBM Security App Exchange is the premier collaboration site for sharing software enhancements, applications and extensions that complement IBM Security solutions. It enables security teams to access tools that help improve visibility into threats, anomalies and malicious activity occurring on the network, while also expanding the mitigation and remediation capabilities deeply integrated in the IBM QRadar Security Intelligence Platform.
